EPIC AIRCRAFT ANNOUNCES BROADIE'S AIRCRAFT AS ITS AUTHORIZED SERVICE CENTER FOR THE CENTRAL SOUTHWEST

July 20, 2021 — Bend, Ore. — Epic Aircraft today announced that it has selected Fort Worth-based Broadie's Aircraft as its Authorized Service Center for the central southwest region of the U.S.

Broadie's Aircraft is an FAA Part 145 Repair Station located at Fort Worth Meacham International Airport (KFTW) in the heart of the Dallas Fort Worth metroplex. Founded in 1946, they are the oldest continuously operating aircraft maintenance facility in Fort Worth, offering turbine, turboprop and piston aircraft maintenance and avionics services and repair.

"We've known the team at Broadie's Aircraft for quite a few years and their reputation for putting the customer first is well deserved," said Epic CEO, Doug King. "Their highly skilled and experienced staff, combined with their reputation for integrity and excellence, make them an ideal partner to support our customers. We enthusiastically welcome them to our network of Epic Authorized Service Centers."

Epic Aircraft received FAA Type Certification for its award winning E1000 model in November 2019. Powered by the Pratt & Whitney Canada 1200-horsepower PT6A-67A engine, the all-carbon fiber single-engine turboprop cruises at 333 knots, climbs at 4,000 feet per minute, operates up to 34,000 feet, and offers a full fuel payload of 1,100 pounds.

The next generation E1000 GX, which received final FAA approvals just last week, is equipped with the Garmin GFC 700 Automatic Flight Control System and the Hartzell 5-blade composite propeller.

"As Broadie's Aircraft celebrates its 75th anniversary, we are extremely pleased to be aligned with Epic Aircraft as their Authorized Service Center," said Kurt Cessac, General Manager at Broadie's Aircraft. "We look forward to a great working relationship with Epic, supporting our mutual customers and maintaining these amazing aircraft."

Broadie's Aircraft will be authorized to provide inspection, maintenance, and repair services for the Epic E1000, the Epic E1000 GX, as well as the legacy experimental Epic LT.

Epic is finalizing agreements with additional service center partners to establish a nationwide service network, providing coverage spanning all U.S. time zones and strategic geographies.
